ERP CORE MAP V2.0

Enterprise Capability Architecture

Propósito

Este documento define el mapa oficial de capacidades empresariales del ERP.

Es la referencia principal para entender:

- Qué capacidades posee la plataforma.
 - Cómo se relacionan.
 - Cómo evolucionan.
 - Qué módulos las implementan.
 - En qué release aparecen.
-

Principio Fundamental

Los módulos no representan departamentos.

Los módulos representan capacidades empresariales.

Filosofía Final

El ERP no se construye alrededor de pantallas.

No se construye alrededor de tablas.

No se construye alrededor de tecnologías.

Se construye alrededor de capacidades empresariales.

Las capacidades generan procesos.

Los procesos generan funcionalidades.

Las funcionalidades generan software.

La tecnología puede cambiar.

Las capacidades empresariales permanecen.
